 SEACOR Environmental Services

SEACOR Environmental Services

SEACOR Environmental Services (SES), a subsidiary of SEACOR Holdings Inc., is a global provider of innovative solutions in risk management and environmental, industrial and emergency preparedness and response.

SES works in partnership with clients to support their business activities worldwide, delivering comprehensive, cost-effective and safety-driven solutions even under the most challenging conditions. SES ensures its clients are prepared for all eventualities and responds swiftly and effectively whenever and wherever emergencies occur.

SES has an unyielding commitment to safety. As an ISO 9001, 14001 and OSHAS 18001 certified organisation, safe operations and protection of the environment are paramount. SES leads the industry in adopting and exceeding the most current health and safety requirements and operating standards.

SES' service credentials are anchored by a team of dedicated and highly experienced environmental, training, emergency response and project management professionals. With a significant and proven track record, SES' people are its greatest asset.

SES serves a diverse range of industries and organisations:

- Oil & Gas Exploration and Production
- Oil Refining, Marketing and Distribution
- Power Generation
- Chemical and Pharmaceutical
- Ports and Shipping
- Airports and Airlines
- Manufacturing
- Government and Military
- Finance and Banking

SES offers a variety of services worldwide:

- Oil Spill Response Management and Clean-up
- Hazardous Material Response Management and Clean-up
- Industrial Fire Fighting and Rescue
- Waste Management
- Site Remediation
- Industrial Services
- Project Management
- Consultancy and Training

Oil Spill and Hazardous Material Response

Having responded to thousands of marine and land-based oil and hazardous material (HAZMAT) spill incidents around the globe, SES' expertise in this field is unsurpassed. SES tailors its services to meet each client's needs and delivers a recognised and proven standard of excellence. Services include:

- Response, Management and Clean-up
- Establishment and Management of Oil Spill and HAZMAT Response Centres
- Response Drills and Exercise Delivery and Management
- Plan Development
- Response and Preparedness Training
- Risk Assessment and Facility Inspection
- Waste Handling, Transportation and Repackaging
- Equipment Rental and Supply

SES works with its customers in the design, establishment and day-to-day management of Tier 2 oil spill response requirements and provides containerised Tier 1 packages for terminals, ports, and offshore oil exploration and production.

Industrial Fire Fighting and Rescue

With extensive global experience in emergency response, SES provides fire fighting and rescue services to a broad range of industrial facilities. Services include:

- Fire Response
- Technical Rescue
 - High Angle
 - Confined Space
 - Road Traffic Accident
 - Marine
- Fire Engineering
- Risk Assessment and Plan Development
- Facility Fire Prevention and Safety Audits

All SES fire fighting services are delivered to meet a variety of international benchmarks and our emergency response personnel are trained to the highest of standards. SES works closely with its clients to deliver customised fire and rescue services to suit their specific operational conditions.

Waste Management

SES provides waste management services to a variety of industrial sectors including oil and gas, ports and shipping, construction, chemical and government agencies. With a broad spectrum of experience, SES has the skills to effectively manage waste streams from both marine and land-based sources. Services include:

- Facility Waste Audits
- On-site Material Sampling and Analysis
- Waste Characterisation and Permitting
- Waste Reduction and Minimisation
- Waste Transportation
- Waste Treatment
- Disposal Facility Identification
- Waste Consolidation and Packaging
- Recycling and Reuse

Site Remediation

SES provides turnkey solutions for the removal of hazardous or contaminated materials from the environment, thereby mitigating their effect on public health and safety. Services include:

- Facility Decontamination
- Oil Sludge Pit Clean-up and Remediation
- Underground Storage Tank Decommissioning
- In-situ/Ex-situ Soil and Water Treatment

To ensure an effective response, SES employs the most appropriate techniques from a range of remediation technologies including:

- Excavation and Removal
- Thermal Treatment
- Stabilisation
- Groundwater Treatment
- Bioremediation

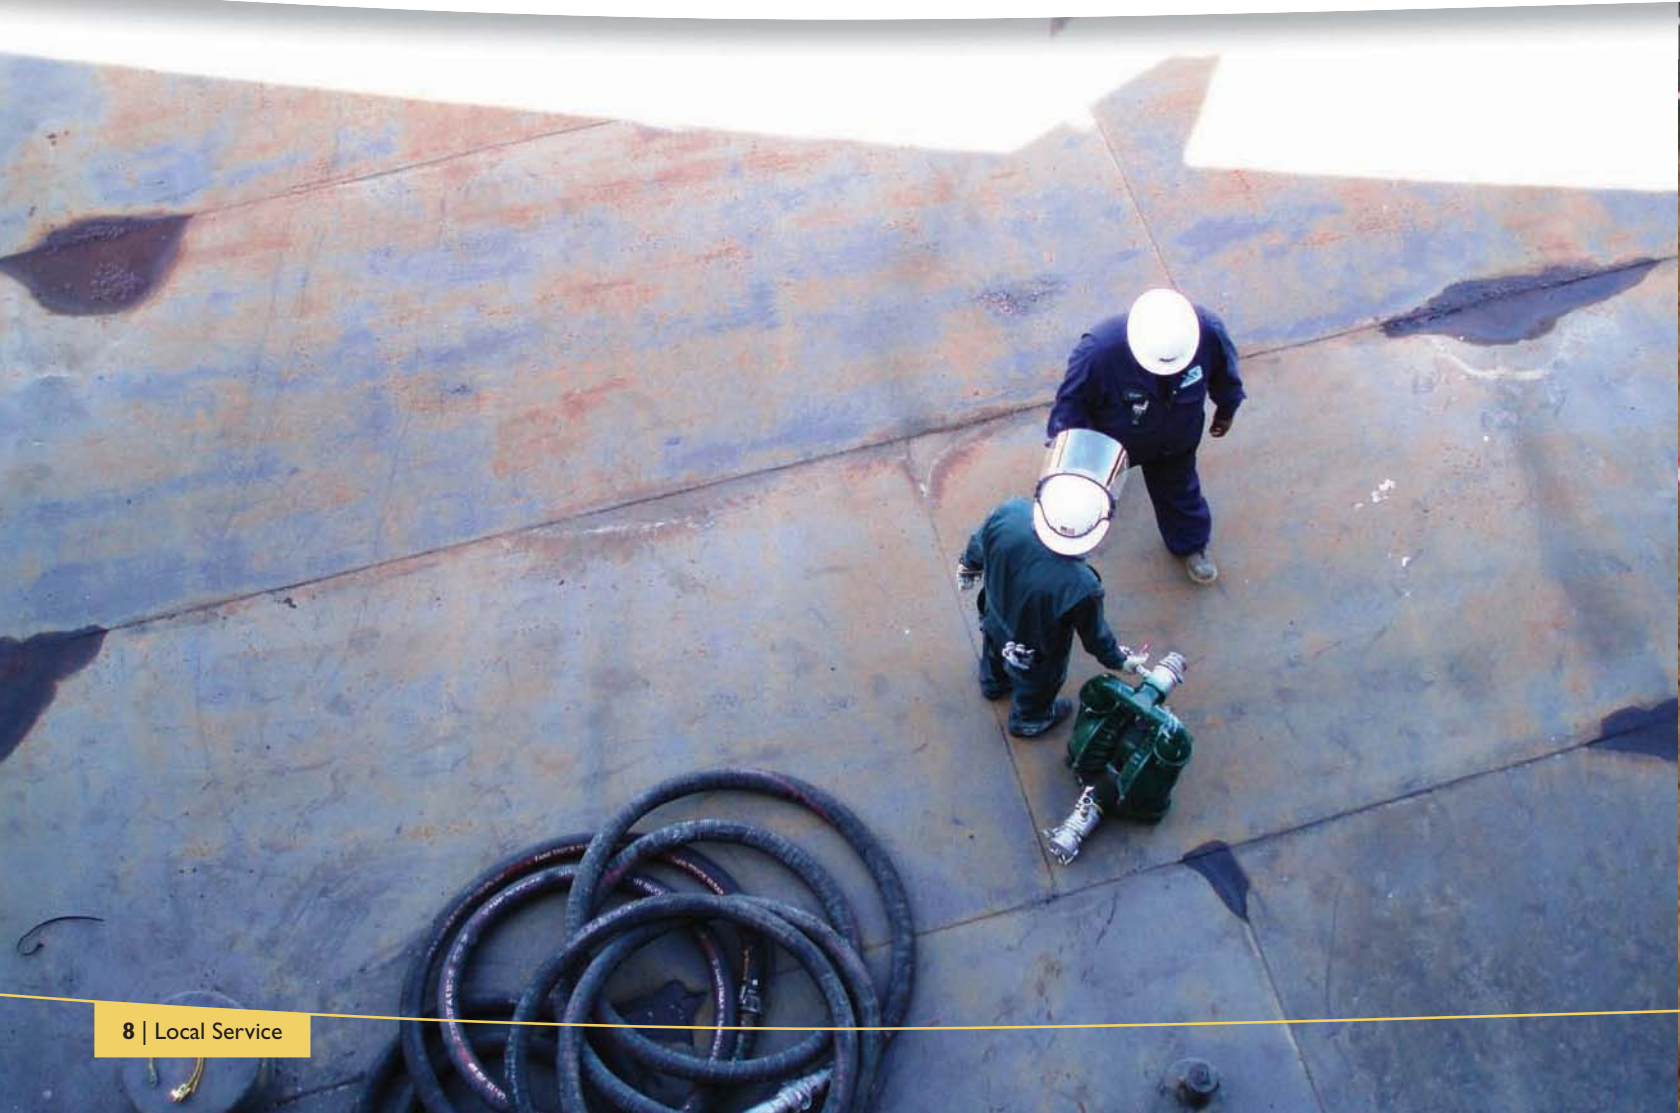

Industrial Services

SES utilises modern technology and highly skilled operators to clear equipment and facilities of waste materials, reduce downtime and optimise clients' production activities. SES sources the best equipment and the most effective techniques to ensure a safe, cost-effective and satisfactory outcome for the client. Services include:

- Marine and Land-based Tank Cleaning Operations
- Tank Farm Inspection and Maintenance
- Product and Hazardous Material Transfers
- Vessel Lightering and Ballasting
- Pond and Lagoon Dewatering and Clean-up
- Pipeline Pigging, Maintenance and Repair
- Storm Drain and Sewer Jetting/Cleaning
- Confined Space Cleaning Work

Industrial service credentials include the cleaning of water intakes, retention ponds, crude oil storage tanks, storm drains and other hazardous facilities.

Project Management

SES has a proven track record in the management of a full spectrum of commercial, industrial, and public sector projects. SES delivers comprehensive management solutions with a dedication to safety, environmental protection and operational excellence.

With a unique team of experienced pipeline and project managers, SES has developed considerable expertise in the turnkey management of pipeline repair projects. SES coordinates the required engineering contractors, procurement specialists and emergency, environmental and medical standby teams to safely and effectively complete the most complex of pipeline repair operations.

SES project management teams regularly manage a diverse range of challenges, from the restoration and operation of fuel storage depots in the Middle East to the construction of pipeline access roads in the Caucasus.

Consultancy and Training

SES ensures its clients maintain an effective capability to manage a wide variety of risks by bringing invaluable first-hand experience in actual crisis situations to its consultancy and training services, which include:

- Regulatory Review and Assessment
- Fire, Safety and Health Audits
- Vessel/Facility Assessments, Inspections and Audits
- Emergency Response, Security and Business Continuity Planning
- News Media and Public Relations
- Drill and Exercise Design and Management
- Training, including:
 - Health and Safety
 - Emergency and Crisis Management
 - Hazardous Material Handling and Response
 - Oil Spill Preparedness and Response
 - Security and Business Continuity

Many of SES' training courses are accredited by professional bodies such as the Institute of Occupational Safety & Health (IOSH), The Nautical Institute (NI) and the Business Continuity Institute (BCI). Services can be delivered both at clients' facilities or SES' state-of-the-art simulation training facilities.
